

UPTAKE has shown that suspension and foliar fertiliser is the missing link in traditional pastoral fertiliser application.

UPTAKE pioneered blending, mixing and applying nutrients at low application rates for Better Land Best

Stock. Many nutrients are necessary for soils, plants and animals in small doses and are essential for soil biological activity, plant nutrient uptake and healthy stock.

UPTAKE's philosophy is that overall nutrition has to start with nutrient supplementation to soils, plants, and then the animals.

UPTAKE recommends and promotes our suspension and foliar products as an integral part of traditional farm fertiliser.

Each farm is unique, and **UPTAKE** likes to find out how *you* want to farm *your* land. This requires an on-site visit and open discussion.

*Maximise your animal health,
production and profit*

FERTILISER COMPANY SINCE 1984
NEW ZEALAND OWNED AND OPERATED

UPTAKE Suspension Fertiliser Blends

UPTAKE's Suspension Fertiliser Blends are designed to shift nutrients from the soil to plants and animals. This is essential for animal production, health, growth and condition.

Nutritional Sufficiency for you and your farm

Benefits

- increase animal production
- increase dry matter
- healthy animals
- improve plant palatability
- improve biological activity and soil aeration
- healthy soil
- strong root system
- increase food web activity
- increase clover growth
- increase mineralization
- improve pasture mineral content

Added Benefits

- can be combined and applied with **UPTAKE**'s Foliar Fertiliser for Soil and Foliar feeding
- can be used in conjunction with some Herbicides, Fungicides and Insecticides

Pasture	Crop	Horticulture
Dairy	Brassica	Grapes
Beef	Wheat	Pip fruit
Sheep	Barley	Stone fruit
Deer	Oats	Kiwifruit
Goats	Maize & Corn	Citrus
Horses	Lucerne	
Hay & Silage	Plantain	
	Fodderbeet	

UPTAKE

Ingredients include:

Nitrogen – 15
Phosphate – 3
Potassium – 3.5
Sulphur – 4.5
Magnesium – 0.02%
Sodium – 0.14%
Copper – 230 ppm
Boron – 240 ppm
Zinc – 240 ppm
Cobalt – 20 ppm
Selenium – 10 ppm

Specifications supplied are W/V (weight to volume)

UPTAKE Foliar Fertiliser

Uptake's Foliar Fertiliser is a balanced blend of natural seaweed and humates designed to activate and stimulate soil life and food web activity.

Benefits

- healthy soil
- healthy animals
- increase dry matter
- strong root system
- increase food web activity
- increase clover
- increase mineralization
- improve pasture mineral content
- can be used in conjunction with some herbicides, fungicides and insecticides

In the manufacture of **UPTAKE** Foliar Fertiliser we only use high-quality chelated trace elements, as they assimilate and translocate in plants more readily. A balanced blend of Nitrogen (N), Phosphorus (P), Potassium (K), Sulphur (S), trace elements, natural seaweed and humates ensures the best possible result.

Pasture	Crop	Horticulture	
Dairy	Brassica	Grapes	Lawns
Beef	Wheat	Kiwifruit	Golf fairways
Sheep	Barley	Citrus	Vegetables
Deer	Oats	Stone fruit	Flowers
Goats	Maize & Corn	Pip fruit	Indoor plants
Horses	Lucerne	Avocados	
Hay & Silage	Plantain		
	Fodderbeet		

UPTAKE Foliar Information

KEEP OUT OF REACH OF CHILDREN

Directions

- shake well, contents may settle

Pasture Care	Application rate	Ratio
Dairy, Beef, Sheep +	15-20 litres per Hectare	1 : 5
Hay, Silage & Lucerne	20-25 litres per Hectare	1 : 5
New grass & cropping prior to final seed bed cultivation	20 litres per Hectare	1 : 5
Crop Care	Application rate	Ratio
Brassica & Fodderbeet	20 litres per Hectare	1 : 5
Lucerne & Plantain	20-25 litres per Hectare	1 : 5
Wheat, Barley & Oats	25 litres per Hectare	1 : 5
Maize & Corn	30-35 litres per Hectare	1 : 5

Horticulture

- please contact **Uptake** for recommendations and application rates.

Best application time

- early morning / late afternoon

Avoid Foliar spraying

- when the weather is hot and dry, as burning of plant leaf may occur
- when temperature is above 30°C, in high humidity
- when temperature is 10°C or below

Make sure that

- Foliar is mixed well with water
- apply in a fine mist (avoid drenching the plant)

No special equipment is required for application

UPTAKE

Ingredients may include:

- Nitrogen
- Potash
- Calcium
- Magnesium
- Sulphur
- Phosphate
- Salt & high-quality trace elements
- Natural seaweed
- Humates

...to ensure the best possible result
